

Setting Up Your Clinical Pharmacology® User Name and Password

Note: You MUST establish your user name and password before attempting to download the PDA version. If you have an existing account with Clinical Pharmacology, follow these directions anyway, and then log in with your *existing* user name/password. The initial access code issued by HAM-TMC Library will extend your existing subscription.

1. Go to <http://www.clinicalpharmacology.com> .
2. Click on *Subscribe Now*.
3. Enter the 15-digit code issued by the Library in the box provided. Enter the code only once. Click *Submit*. (Do **not** select a GSM program; your code contains that information.)
4. If you have an existing user name/password from another subscription, enter these now on the GSM.com Account screen and click *Continue*.
5. If you are a new user, choose *Click Here to Register Now*.
6. In the New Account Setup screen that appears, enter your registration information and a user name/password of your choosing. Click *Submit Information*.
7. You'll be taken back to the home screen. Click *Subscriber Login*, enter your user name and password, and re-click the *Subscriber Login* button.

After completing this process, you will be able to use Clinical Pharmacology wherever you are, by going to <http://www.clinicalpharmacology.com> .
